

SYSTEM STRUCTURE (A1–A4)

VALIDATION EXPOSURE (A5)

A1 Competency Regime

A2 Learning Formulation

A3 Runtime Authority

A4 Runtime Assurance

A5 Validation Exposure

What validation exposure supports the reported claim?

Evidence Support

L5

Sustained deployment

Workflow-integrated operation across repeated tasks or sites

L4

Near-operational field validation

Construction-relevant hardware under disclosed supervision and disturbances

L3

Construction-representative testbed

Yard-scale or controlled mock-up validation

L2

Diverse laboratory hardware

Controlled variation across hardware conditions

L1

Isolated laboratory fixture

Tightly controlled single-condition hardware testing

L0

Simulation-only evaluation

No real hardware execution
