

1. Reported system descriptors

1	Robotic platform Robot / manipulator / equipment
2	Task context Excavation / assembly /lifting / navigation
3	Learning setup DRL method / training pathway
4	Validation setting Simulation / laboratory / field
5	Reported outcomes Metrics / results

2. Five-axis interpretation protocol

3. Supported claim scope

Reported descriptors -----> Disclosed system evidence -----> A1-A5 interpretation -----> Supported claim scope -----> Readiness interpretation
